

# Midstream Investment Package

The Midstream Investment Package empowers investors to connect commodity production and price forecasts to the financial impacts on midstream companies. Analysts and portfolio managers can understand the full value chain where midstream companies operate and identify where the opportunities and risks exist. In addition to commodity and financial analytics, the package includes access to our range of expert analysts to walk through your market and data-related questions.

## TWO PACKAGE OPTIONS

### PACKAGE ONE:

### Strategic Midstream Pro+ Financial Suite

Empower your business with the Strategic Midstream Pro+ Financial Suite, designed to provide unparalleled insights and elevate your financial strategies in the industry. With this comprehensive package, you will receive the best production forecasts, enabling you to seamlessly connect production data across 1,300 infrastructure assets. Gain visibility into the rates associated with these assets, allowing for informed decision-making.

#### Key Features:

- **Accurate Forecasts**  
Access the industry's best production forecasts, ensuring precision in your planning and decision-making processes.
- **Comprehensive Infrastructure Insights**  
Tie production seamlessly through our extensive network of 1,300 infrastructure assets, allowing for a holistic understanding of your operational landscape.
- **Rate Visibility**  
Gain insights into the rates associated with each infrastructure asset, enabling you to optimize resource allocation and maximize efficiency.
- **Integrated Company Forecasts**  
Roll up asset-specific data to generate comprehensive company forecasts, providing a strategic overview of your organization's performance.

#### Deliverables:

- **Weekly Rig to System Data**  
Stay updated with real-time rig to system data, facilitating proactive decision-making and operational management.
- **Monthly Production Forecasts**  
Receive monthly forecasts to align your strategies with evolving market dynamics and industry trends.
- **Quarterly Midstream Company Forecasts**  
Obtain quarterly insights into your company's midstream operations, aiding in long-term planning and performance evaluation.

#### Plus:

- Access to our team of expert analysts to talk through your market and data-related questions
- You can confidently navigate the complex landscape of the industry, optimize your financial strategies, and make informed decisions that propel your business towards unprecedented success.

**PACKAGE TWO:**

## Strategic Midstream Financial Suite

Unlock strategic financial insights without delving into intricate company and asset details with our Strategic Midstream Financial Suite. Tailored for those seeking concise yet impactful financial intelligence, this suite offers a streamlined approach to understanding the market.

**Quarterly Consensus Comparison Report:**

Access a comprehensive summary of financial data from all companies within Energy Data Studio™ in one consolidated report. Identify variations between East Daley’s financial forecasts and the industry consensus, providing valuable insights for strategic decision-making.

**Quarterly Company Comparison and Asset Breakdown:**

Effortlessly compare and contrast EBITDA for midstream companies within Energy Data Studio™ based on commodities, locations, and asset types. This breakdown facilitates a quick understanding of financial performance across key parameters.

**Quarterly Company Earnings Preview and Review Reports and Models:**

Navigate through customized dashboards for each midstream company included in East Daley’s dataset. Gain access to crucial information about their midstream assets, along with tailored earnings previews, review reports, and models. Stay ahead of the curve with timely and insightful data to inform your financial strategies.
